

Robert Avila is the National Sales Manager for Finetech, a manufacturer of high-accuracy die bonding and advanced rework equipment. He has been with Finetech for the past 16 years, previously working as a regional sales manager and an application engineer.

Prior to his time at Finetech, he was a new product engineer at Emcore, a fiber optics company located in Albuquerque, NM, and a process engineer at Motorola Ceramics Group in Albuquerque, NM, where he helped to design and implement ceramic filters for wireless phones and pagers. In addition, he was a key contributor to the development of a low noise amplifier for the Iridium Project, a cluster of telecommunications satellites that orbit from pole to pole.
